

SMARTCARA PCS-500: the food waste dryer that is winning over the nautical and Horeca sectors

The trade press confirms: SMARTCARA PCS-500 is the best solution for organic waste management in the nautical sector and the hospitality world.

The SMARTCARA PCS-500 semi-professional food waste dryer, distributed exclusively in Europe by Mares Group, has been featured in numerous articles in leading trade publications:

Il Giornale della Vela, Nautica, Retail & Food, Horeca News, to name just a few.

This media interest confirms a clear trend: sustainability and intelligent waste management are increasingly central issues, not only on land but also at sea.

For boating: smart & green even on board

Plug & Play even on sailing boats and yachts, SmartCara PCS-500 allows organic waste to be managed without odours, without waste liquids and without any waste, transforming it into a sterile powder.

Ideal for small spaces and locations where autonomy and hygiene are essential.

For the HoReCa and hospitality business: efficiency and hygiene

From small restaurants and bars to B&Bs, SmartCara PCS-500 is the smart solution for reducing the volume of organic waste by up to 90% and simplifying its daily management.

Easy to install, it has a direct impact on hygiene, operating costs and environmental sustainability.

Recent press releases and publications confirm the validity and versatility of the SmartCara PCS-500 organic waste dryer

We are proud to see how the innovation distributed by Mares Group is recognised nationally by authoritative voices in the nautical and foodservice sectors.

Recognition by the trade press confirms the value of the innovation that Mares Group brings to the market in key sectors such as boating and hospitality.
